NPDC's Draft 10 Year Plan

Office Use Only: 68-A

Submission No: 1601

K Dodunski

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Get on to it and fix it now.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Water metering is the way to go. Water tank per household payed on rates like heating is now.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Again fix the problem once and for all.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Delete anymore monies wasted on traversing the mountain but extend walkway to Waitara.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Climate change is a woke idea stop working on the CAF. Electric cars and trucks a dream our roads are not up to it.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

User pays. We are paying for a Rugby Park for a minor public now.

What else?

Roading in and around NP needs attention as our people numbers are rising congestion is a problem. Nothing has been done to our Roads for such a long time. Forget spending monies on concerts and likes, infrastructure is more important for all peoples of Taranaki. Submissions are a waste of time as council does what it likes example of this is the whitewash done on the Maori Wards. No majority was entered into again the minority won without consultation. All wards should be abolished so we can vote people who we need in council.

NPDC's Draft 10 Year Plan

Office Use Only: 3636

Submission No: 1602

George James Gardiner

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I am not in favor of water meters as in time and sooner than you think the population growth will outstrip the potential benefit of installing them. What is needed and I'm all for it is to somehow increase our water storage facilities. How many new dams have been built ANYWHERE in NZ in the last 30 years or more. It means more dams yes and fauna and flora within these areas being lost but we cant have everything. Where will we be without extra water storage in 50 100 years???? Maybe moving to outer space!!!!

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I have witnessed flooding in areas of Waitara, yes it is needing to be fixed asap

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

These tracks and trails brings tourists to our Taranaki which enormously benefits the economy. More jobs etc.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

We desperately need a multi-sport hub. It will do big things in developing our younger generation of kids. It will hopefully with the right guidance get children into sports off the streets and out of trouble. They need to be kept active and off the electronic contraptions

NPDC's Draft 10 Year Plan

Office Use Only: 3637

Submission No: 1603

Heather Thomas

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3646

Submission No: 1605

Dom Cooksley

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Why are rural rates high when there is no water or sewer services and no rubbish collection

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3649

Submission No: 1606

Matt King

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

With an expanding population basic services like sewerage have to be a priority

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Being a rural property I would like to see no change in my own rates for a water supply problem that doesn't affect my home. If I want more water I put in another tank..... & make the most of the rainfall.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

These would be a bonus to our region but infrastructure should come first

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Once again infrastructure first if theres cash left after that look at the glossy "wants"

NPDC's Draft 10 Year Plan

Office Use Only: 3650

Submission No: 1607

Geraldine van Tromp

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Rural land owners already pay towards capturing of rain water, and thus their rates should not be affected by the water saving plan execution destined for the urban area.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Good trails and tracks provide a draw-card for tourism, with a positive knock-on effect to other tourism-related industries. Furthermore, trails and tracks help keep local kids off streets and engaging in a positive past-time (cycling, dirt jumping, building features etc). These tracks will also provide cycleways enabling cycling as a viable means of commuting. At the moment, there are too many gaps in the network for cycling to be a viable option, beyond a short commute.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

A sports hub such as this is required in New Plymouth, to assist in developing sports in the local schools. As with cycle-ways, keep youth off the streets and engaging in a positive past-time.

NPDC's Draft 10 Year Plan

Office Use Only: 3652

Submission No: 1608

Noel Stachurski

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Obviously just keeping up with repairing failures is not an option. Improvements and replacements need to be made before failures occur. When major works are carried out, are they put out for tender with local firms. One would hope so.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I agree with extending the coastal walkway but not with the Taranaki Traverse. I was a trumper until for health reasons I had to give up. I believe that with the walkway extension and Lake Mangamahoe and other tracks in the area the bikers and mountain bikers are quite well catered for. I'm sure the majority trampers would be quite happy with the number of tracks available to them currently.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I believe there absolutely is climate change happening but to think we can stop it or slightly slow it down is akin to stopping the tides from rising and falling. If it was possible our contribution would be totally minimal. Just today I heard that there are 40 ships, because of the current NSW flooding, standing off Newcastle Australia waiting to load coal for China. Air and environment pollution reduction is something worth working towards but to think we can stop climate change.....No. With regards to electrifying the council fleet thought should be given to the ongoing maintenance as batteries don't last forever and are expensive to replace....would help with pollution I guess. I'm don't deny there is climate change, far from it, but I just don't think we can do little or anything about it.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I can see the value of the sports hub being able to centralize a number of codes. As a matter of interest what will happen to the Waiwhakaiho Netball courts?

What else?

With regards to rate rises 12% for the first year and approx 6% for the next 9 years....it could become almost unaffordable for a lot of people. Our rates will rise to over \$4000 after 4 years and to approx \$5500 at year ten if my sums are correct..

NPDC's Draft 10 Year Plan

Office Use Only: 3654

Submission No: 1609

Bill Husband

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3655

Submission No: 1610

Adrienne Hoskin

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Water supply, plumbing, drainage, sewerage, water treatment etc are essential to any community's health, survival and growth. I cannot understand why successive councils have continued to neglect servicing and expanding where necessary. I pay rates on the understanding that it is to be used to maintain and improve these infrastructures BEFORE financing any other non essential projects.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Pretty tunnel vision options. No doubt water meters will be installed sometime in the future, but at the moment the cost of installing meters would be better spent improving the existing supply and plumbing. Can still implement a water saving plan, including encouraging more rain water harvesting (water tanks). Could also look at requiring new builds to install some tanks to supplement domestic use. Would reduce storm water run off as well. I feel like ratepayers are being threatened with dire consequences if we don't go along with what you have listed. There are other ways to improve our high usage. And stop trying to cut corners and defer work in the future.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Yes agree the Council should spend whatever is required.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Not a priority! Just finished telling us how much it will cost to fix our water system and that is much more important at the moment.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Ask me again when you have sorted out our water problem, stormwater and sewerage systems all updated, our congested roads improved.

What else?

I am giving this feedback due to publicity about a lack of feedback. I have contributed in the past and as always, made no difference to any outcome. You want feed back then just go ahead with your original plan. I am sick of paying for fancy art galleries, unnecessary airport upgrades, extravagant grandstand rebuilds, walkway extensions, at the expense of funding basic infrastructure. All those nice things ARE an asset to our community but they are not to be achieved at the expense of the basic foundations we require to function in a healthy, efficient and sustainable manner, and able to support and promote orderly growth.

NPDC's Draft 10 Year Plan

Office Use Only: 3656

Submission No: 1611

Kirsten Horgan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Comments

For those of us who live in the country it seems unfair that we have to pay for water systems that we dont have access to....

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Definitely should be paid for by those who actually use the water rather than by all of us as we dont even use the water as we live in the country

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Again - I live in the country so how would improving Waitaras water benefit me and my family? I get that it effects others but why should I have to pay for it when I need to support the needs of my family.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The "walkway" (if you can even call it that) that you spent money on in Inglewood isnt even maintained. How is extending the walkway helping everyday Taranaki residents. I see that it helps those that can use it and those whom own business' such as hotels etc where people may stay to use the walkway but for us that live in rural Taranaki who dont get the opportunity to use the walkway as we are too busy working there is not benefit.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Private funding could be used for this facility by those that would actually get to use itagain how are those that live rurally going to benefit when we arent close enough to even use it.

NPDC's Draft 10 Year Plan

Office Use Only: 3657

Submission No: 1612

Martin Higham

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Comments

The plumbing should have never been allowed to have gotten into the state you claim its in at the present time. The planing of the infrastucture is solely to blame, and the people of today are expected to pick up the tab one way or another for the incompetence of previous councils.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Once again its all down to non existence of infrastructure maintenance in the past

Improving stormwater management in Waitara

Comments

I dont live in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

What else?

Stop punnishing the people of today ie Rate payers

NPDC's Draft 10 Year Plan

Office Use Only: 3661

Submission No: 1613

Graham Buick

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Apart from having a properly functioning system with minimal leaks or broken pipes, we should aim for a situation where water restrictions are not required. To many people, gardens are important and to have plants and lawns suffer from lack of water is frustrating.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Improve the overall look of the area by planting deciduous trees to have the variation in look and colour.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The hub to provide many options for sports and recreation

What else?

I am not happy with the waste management system. I think that more pressure and legislation is required to make companies provide biodegradable packaging for more items. It is a political copout to put all the pressure on the general public to try and work out what goes where. I also do not see enough accountability from the organisations handling the waste.

NPDC's Draft 10 Year Plan

Office Use Only: 3664

Submission No: 1614

Marcus Julian

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This has been going on for years its needs to be fixed but bearing in mind the effects covid has had on many house holds and businesses. Its been very hard and finances are on not what they used to be for most house holds.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Please consider average house holds first or new house owners. They only just scrap buy more expence will Place major stress on already stretched house holds/ familys all the bills increase and wages stay relatively the same.

NPDC's Draft 10 Year Plan

Office Use Only: 3666

Submission No: 1615

Elizabeth Winters

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Essential work, but funding through debt spreads the cost.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Support water meters

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Justine Shera

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

In favour of putting in meters so that people become more aware of their usage and the actual cost.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

If this development comes at the cost of a significant rate increase when many families are already struggling, I don't think this is the time to be extending the walkway. We already have so many parks and walkways, maybe some promotion into what we have available already at a much lower budget would a better idea.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I am against the development of a sports hub. Not only is there the cost, but you are taking away what is special about community sport. Clubs are important in a community, creating a hub takes sport and get together away from the clubs making them extinct. Mass gatherings have no sense of community about them either. We would rather continue supporting our local club and members.

What else?

Would love to see more green space downtown, Huatoki plaza would be amazing as a green space. A 12% increase in rates is a huge jump in one go. People are already struggling, with the recent rise in property values as well - you will make this an unaffordable place to live.

NPDC's Draft 10 Year Plan

Office Use Only: 3681

Submission No: 1623

Peter Soffe

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It is a very sad state of affairs that our council and our elected officials, both past and present, have allowed it to get in the state that it is. This is an obvious failure of the councils and now it is expecting rate payers to fork out large sums of money, of which a lot can not afford, to fix in short period of time. Yes it needs to be fixed and yes it needs to be paid for however a 12% rates rise is too extreme for everyone within the New Plymouth District. Identify what is most urgent then make the plan on the best way to ensure this is fixed in the most cost effective manner. Stop paying consultants enormous figures to do your job for a start.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I agree with saving of water however I do have one question. Currently in our rates we pay a water levy, so when water meters are introduced will we then be paying a water levy plus for what water we use. If so then is this not "Double dipping"?. Has the council looked at subsidising water tanks for houses within the district so that individuals could store water (rain water) obtained from the roof. This would assist hugely in the overuse of our current system.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I believe we have enough locally and this is more a want and not a need. Very much like the Wind Wand, Len Lye centre, the Rugby Park Rebuild.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Personally I feel that what the Government, both local and Central, are demanding of the current Kiwi surrounding the Climate change issues is ludicrous. Our National Carbon footprint accounts for 0.12% of the global footprint, however we are expected to change our way of life overnight. I say overnight because 30yrs is overnight when you are talking about what is expected over what has gone wrong and how long it has taken for it to go wrong globally. What we achieve in that time by adopting the measures we are expected to adopt is totally negligible. And if you believe the Super Powers are going to do their bit then I definitely believe we have stuffed up in electing you to your position.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Again a want not a need. Just like Rugby Park, a waste of rate payers money. Use this area for building a Housing area for the young of New Plymouth to get onto the housing ladder. Better housing for people in need as opposed to a huge sports complex when they are already catered for. Netball-Waiwhakaiho Swimming-Kawaroa Hockey-By Cemetary Rugby-Rugby Park, Old Boys Park, NPBHS, Spotswood etc Cycling-Could do with a designated facility.

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION We write to express our deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. We are business owners of elite kitchens situated at 23 Oropuriri Road, Waiwhakaiho, we employ 35 staff. The intersection at Egmont Road/State Highway 3 presents a great danger to our staff, clients, and community unless immediate measures are taken to improve the safety at this intersection. The greatest health and safety threat to our staff and clients is the danger of this intersection, which they must navigate daily. We will see a fatality unless immediate measures are taken to improve the safety at this intersection. This intersection presents such a risk that we can no longer wait to see urgency here. Ourselves and several of our staff members have either witnessed or been involved in accidents at the intersection since we occupied in 2018. Monday 15th March 2021 an employee was involved in an accident which wrote off her vehicle, thankfully she was not seriously injured in what could have been a fatal collision. Highway 3 traffic travelling to and from New Plymouth was blocked while emergency services tended to the parties involved and clear the highway. This was at the peak traffic time of 8am, commuters were unable to get to work and schools on time. One-week on from this accident on Monday 22nd March 2021, we ourselves were involved in a near collision of the exact same circumstance with a motorist trying to exit Egmont Road to the East while we were entering Egmont Road from the Highway. We both narrowly avoided a collision, with oncoming 100-80km/hr traffic. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 100-80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and

roadblocks to incoming and outgoing highway traffic to New Plymouth. We purchased the land here at Oropuriri Road in the knowledge that our council would build an interconnecting road between Egmont Road to Henwood Road. This has not happened, and communication regarding this plan has fallen silent. We request the council urgently prioritise this issue to either:

1. Introduce traffic lights for motorists to enter and exit Egmont Road safely
2. Build the interconnecting road between Egmont Road and Henwood Road as planned

NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore we request for the NPDC to step up and take responsibility for safety of their citizen and constituents.

NPDC's Draft 10 Year Plan

Office Use Only: 3687

Submission No: 1626

Scott Ross

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Water meters make sense - it's a scarce asset and people should pay for what they use.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I would need to see some more data on how many people use the tracks and trails that are taxpayers.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electricity comes from natural gas and this will put additional strain on the utility network. This seems unnecessary.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I would need more details on the proposed hub before supporting it.

What else?

Roads, rates and rubbish should be the three main things that NPDC focuses on. Leave the social issues out of local government as well.

NPDC's Draft 10 Year Plan

Office Use Only: 3688

Submission No: 1627

Matt Verry

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

A system wide approach is required- the current patchwork approach is inefficient. While the piecemeal approach to asset renewal is more visible in roading (doing small patches of Devon street at a time for example) it does feel like the same approach is taken to three waters. At the end of the day, the lowest cost to the Taranaki community will be from rationalising the work into suitable work packs- improving/renewing a whole area rather than just patching up the holes. Taking on the big challenge now allows us to do a generational reset and enable long term the council to settle back into sustainable asset management practices.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

This needs to be tested against rate payers given the current levels of water in New Plymouth. I would prefer that the system losses are addressed first prior to restricting water usage, and then only if there is insufficient supply then the council roll out water reduction initiatives. Asking the public to conserve water when still huge portions are lost to leaks can be perceived as throwing stones in glass houses. Once the system is repaired (through the required renewals) then the discussion on water usage reduction can be held in better faith.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

The current state of tracks and trails around Taranaki is excellent and one of the defining features of our quality of life. Continuing this legacy will keep Taranaki as a desirable long term place to live.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

The council needs to look at more than electric vehicles and forestry. All investment decisions (waste water plants etc) need to be completed under the climate emergency framework and a sustainable solution found.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Personally I feel like horse racing has been subsidised by tax and ratepayers at a level disproportionate to the number of users. A multisport complex will accommodate a much higher number of users on a more frequent basis. There are other horse racing tracks in the region that could accommodate all of the existing New Plymouth meets.

What else?

I support the councils approach to infrastructure and the generational reset to account for the significant under investment over the past couple of decades. It would be great to see more planning into a sustainable asset management practice to prevent such underinvestments occurring again and undermining the work about to be undertaken.

Why has it been left so long that it is a serious issue rather than continuous maintenance very year?

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Whether it is from rates or a water meter it is still going to cost individuals a lot of money.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

This should have been thought of before planning consent were given so why waste money on it now.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I love using them. Think of the regular cyclist and not just the mountain bikers who frighten most walkers and regular cyclists.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

The council has just jumped on the climate bandwagon which costs everyone money with minimum results.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Why not build it at the corner of Smart road where the chemical works was? We do not need another shopping mall and cinema complex as the centre of town is already dead why make it worse.

What else?

I was totally against the fancy option for upgrading the airport. I used it for the first time last week and it is a total waste of money. It could have been expanded without all the fancy roofing which nobody looks at. There is very little improvement in the seating area. The old mural could easily fit in the new terminal. No-one listened to the majority then so I am very sceptical that the council will take any notice of what the people feedback in this survey. I have spoken to several other airport users and they totally agree with me. There are some stupid design features too eg when you sit down there are plus and multiplication signs on the glass just at eye level which makes looking out difficult. Why two cafes? Only one is needed.

NPDC's Draft 10 Year Plan

Office Use Only: 3703

Submission No: 1631

Kath Lauderdale

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

As further climate events are expected to recur along with other emergencies I would like to see the council either provide or facilitate the expense to householders of water tanks and other retrofitting of homes and communities such a solar so homes and communities are more self sustaining and resilient to disruptions.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I am very opposed to charging for water and both industry particularly but also households should be empowered to collect their own as rainwater is abundant here. Grey waste systems etc.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Greening is a subjective term I think we need to encourage more walkable safe areas for the whole city to discourage car use and as a part of transport planning. Including adequate community gardens, fruit plantings and facilities which are walk and bike friendly friendly with adequate electric public transport for wet weather travel and green the whole city and suburbs.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

I'm not sure this is enough and climate change should be a consideration for every council investment and decision including ensuring NPDC does not hold or support investments which cause climate change like oil and gas, intensive farming (except for rewilding) or weapons for example.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

If Rugby keeps getting money for only one sector of society it, like many other previous things, is a disgrace this hasn't already been done. As well as climate change advice on all council activities to build community resilience I think Council needs equity advice as all the support has gone to small sectors instead of being equitably shared to provide for the needs of the whole community. Including more and better community housing. Are investments equal for men and women are they equitable between youth, children and the elderly for example or have they been weighted toward middle aged men's interests and business unfairly?

What else?

I believe a housing plan needs to be developed by council and with urgency. Too many people are homeless in Taranaki and community housing is inadequate and it's going to get much worse very fast. A healthy community cannot tolerate this inequity and council can provide new well designed rentals and release industrial sites to do so using an investment strategy and by divesting out of bad things internationally and investing in this locally. It may also like to think of provision of loans and advice for community led developments for people to build and live here.

Submission No: 1633

Stuart Carter

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3713

Submission No: 1634

Liz Filer

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It's necessary to fix now. If left for future generations it will be cost prohibitive.

Saving water and water meters

Comments

I suggest a subsidy program to encourage home owners to install water tanks for garden use and flushing toilets.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

NP/Taranaki is being left behind. I cycle regularly NZ's cycle trails and when asked by fellow cyclists I cannot recommend any 2 or 3 day rides in our area. The Forgotten Hiway is not a ride I could recommend to less experienced riders.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Our national government needs to be more supportive of Taranaki.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

I am of retirement age and are conscious of large Rate increases. I believe we must have a progressive attitude within a reasonable cost.

NPDC's Draft 10 Year Plan

Office Use Only: 3714

Submission No: 1635

Kathy Whitehead

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Unfortunately you haven't given the option to reduce needless spending, significantly reduce staffing levels, Get rid of the Len Lye Centre - or make it fully user pays (instead on hiding the costs in with GB. You should have been accruing funds for this out of our rates for years rather than spending it on frivolous wants. Forget the outdoor spaces. Forget the other Pet Projects. What happened to us being Rates Free after the sale of Powerco. The biggest lie yet. SO sell what you can. Ratepayers are not a bottomless pit. There has to be a line drawn in the sand. Your rates increases have outstripped my salary increases for years. This means there is nothing left in the coffers for your projects

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Actually option 2A. Forget the electric vehicles. Have you looked at the batteries and the costs associated with changing these. What happens to the old batteries. This is not a Green Solution at all. Just smoke and mirrors. Plant all you want. More planting is good

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have to live within our means. If you want a multi sport hub, make it user pays. Not ratepayer pays. Makes sense to me

NPDC's Draft 10 Year Plan

Office Use Only: 3715

Submission No: 1636

Keith

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

These costs are known and should already be included in rates and should not face higher than inflationary costs to rate payers. With the increase in land and house costs, coupled with increase in population in new plymouth the rates revenue should already be on the increase well beyond inflation. Businesses operate in an environment where they must be competitive even with lower sales or lower commodity prices, however the council increases year on year costs to rate payers and still cannot manage the resources without additional increases. This is poor business practice and rate payers as customers shouldn't be forced to continuously pay for poor financial management.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Yarrows stadium is adequate for the Taranaki region's size. And until there is a substitute industry for twilighting oil and gas, and or pressured farming, then an investment of this nature is not likely to be valuable. If both of Taranaki's key industries continue to be pushed out of the market through climate change, or the mountain eruption causes severe damage, then the region is likely to reduce in value over the next 2 decades.

NPDC's Draft 10 Year Plan

Office Use Only: 3717

Submission No: 1637

Peter Catt

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Need to factor in finding an alternative water source. In time Taranaki will erupt and endanger New Plymouth's water supply This preferably should be an underground aquifer. We will still need more water storage of treated water This sort of thinking can help build a resilient city. A week or more with out water would b significant health, safety and financial cost

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

There need's to be thought given to the poor and vulnerable in terms of pricing. Perhaps tired pricing system

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

We are having increasingly frequent heavy rain events. Again spending now builds resilience into our community

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

There will be increasing demands on our community to reduce emissions This plan is a start but will need ongoing work

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

In a changing world making our infrastructure resilient to future threats (climate change and the 1% per annum risk of an eruption of Taranaki) this is a good start but it only a beginning

NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Rates are high enough so use that money and fix the plumbing/water ways. Water metres should NOT be installed to gain this!!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Listen to the rate payers and do NOT install water meters

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Instead of extending the walk way which is long enough, use the money to create something for the kids and family IE: water park etc New Plymouth has nothing in that regard for children. Lollie pops, chipmunks, rumpus Room and all blunting centres have all shut down leaving nothing in that aspect for families and children to do.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

No way! Build something for all families ie a water park or theme park something for the kids. Now that chipmunks, rumpus room and all trampolineplaces are shut new plymouth has nothing. A multi sports centre is not suitable for everyone let alone tourist attraction for familys visiting np

What else?

Listen to the community, listen to the rare payers and stop raising the rate percentage 12% is ridiculous. We are a small town not auckland

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

build more capacity. Water meters don't fix a fundamental supply problem. You are just gathering revenue in an already over-rated environment.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

A complete waste of ratepayers money.

What else?

Don't waste our money on unimportant schemes.

NPDC's Draft 10 Year Plan

Office Use Only: 3737

Submission No: 1644

Kate Swan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

If this goes ahead - the Council needs to actually put the works in place. This has been a talked about topic for years, but it appears that nothing has ever actually happened. Don't raise the rates to pay for it and then borrow from Peter to pay Paul, meaning in 10 years we have another substantial increase to pay for the work that needs to be done now.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is so incredibly needed - the existing facilities are not up to the demand. We want to have a healthy generation developing, and this includes having the facilities available for sporting options. We utilise the hockey turf and netball courts regularly through both children and adults sporting commitments, and there is so much work that is needed to make them user friendly, particularly in relation to parking.

NPDC's Draft 10 Year Plan

Office Use Only: 3738

Submission No: 1645

Rick Lucas

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We already pay for our water in our rates, as long as you focus on the needs and not so much the wants you shouldn't need to charge more.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara pay rates too, if it was Oakura would this Evan be a question?

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I live in Waitara and have to come through to New Plymouth if I want to go for a walk or run, we need the walkway extended.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Honestly I see this as a want, we pay rates to pay for local infrastructure, I do believe that it does need to be addressed but by central government, [its the current fashion statement and if we aren't apart of it then we aren't the cool kids]

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

If we can't afford it don't do it, it's like buying rugby tickets and not paying for the power bill, again this is a want and if we don't have all our needs sorted first we can't look at our wants.

What else?

I don't believe you should give tickets for expired registration on vehicles, Reason: well you are literally punishing poor people by making them pay a fine

NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Another cost to homeowners that we can't afford. Wages are not high enough to cover the extra expense, this will Break some people who are already struggling especially those families on one income or not working for various reasons.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

There are far more urgent everyday needs of the district communities to have priority before adding to our already great sport hubs. Let the sports people pay rather than 'Joe Public'

What else?

Rates are too high now. Adding a large hike in rates will overburden people & make the majority of our community disgruntled. Give us a break please, no one can afford this.

NPDC's Draft 10 Year Plan

Office Use Only: 3746

Submission No: 1648

Paul Jones

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

There is a move to water meters and charging, so why not charge EVERY user of the municipal supply a average rate that covers charges of supplying the water. A 1000l of water should cost the same to all users. This would result in 0 costs for future debt as costs will be covered going forwards.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

water should be provided to ratepayers at an equal cost to all, a liter of water should cost the same to citizens and business alike.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

People live here, and visit, because of the natural environment. We need the tracks, parks and trail to contain them and stop people further ruining the place.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

The CAF could be given a lot more priority by council. Either you understand what an emergency is and take appropriate action or die. Hence why the term emergency, surely? The time for band aid fixes is long past.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

We should have a quicker more robust building consent process

NPDC's Draft 10 Year Plan

Office Use Only: 3748

Harry Smith

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Do it once, do it right

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Option 3 is amazing for sweet FA more

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Insufficient

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Only accelerate if sports get their funds in time

What else?

Your Mayor's communication was inappropriate and undermining of the decisions you've made. Council comms have gone done hill so much in recent years even though the number of PR folk has skyrocketed. This is probably the only budget that deserves to be cut since they can't even tell the Mayor his press releases are stupid and offensive to the community.

NPDC's Draft 10 Year Plan

Office Use Only: 3754

Submission No: 1650

Channa Perry

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Please consider meeting costs in through a fixed rates charge so costs are shared equally . Low income home owners are more likely to have poor water systems and leaks and less able to fund repairs so will be unfairly burdened with water meter charges. Water meters also unfairly increase costs for large families. Also it's unclear who will fund water costs in rental properties. If it's tenants it will be unaffordable. If it's landlords then there is a risk the tenants do not manage water use (as they are not paying for it) but they will end up paying for it indirectly through increased rents (to cover the costs). Essentially I am opposed to water meters as they inequitably impact negatively on those with low income and large families/whanau.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara should be a priority for investment from an equity perspective.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Prioritise development of the Bell Block to Waitara walkway over other trails

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I support tree planting but not electric cars for NPDC staff. This is high cost for relatively low impact and looks like virtue signalling. There is a lot of evidence out there that electric cars come with their own (negative) environmental impacts and are not as "green" as the manufacturers suggest. We should be looking to reduce travel requirements in the first place and use technology where possible (eg use of videoconferencing) and bringing services close to home wherever possible (eg stop the ridiculous practice of transporting rubbish out of region in diesel trucks). I had to choose option 1 as there was no option that supported other green initiatives but without e cars.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Don't invest in this until the Water backlog is sorted. This track growth is a nice to have which can happen in a few years time from now.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Plant the trees. Get more of your council using bikes. Electric vehicles are still too expensive. What happens with the batteries at the end of their life? What metals are being unsustainably mined for creating new vehicles. Best to use the existing vehicles for longer which is a more sustainable option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

A nice to have. Spend rates money on water issues

What else?

The council seems to have little idea about those on fixed incomes being able to pay their rates and save for rates increases. The council may be needing to tighten its belt and decrease its discretionary spending so they can pay for core infrastructure

NPDC's Draft 10 Year Plan

Office Use Only: 3773

Comments

Rather just the tracks

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Rates are going to become unaffordable and family's will struggle with 12%rise

NPDC's Draft 10 Year Plan

Office Use Only: 3805

Submission No: 1667

Chaz Hall

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3807

Submission No: 1668

Yana George

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I don't believe making residents pay for water usage will reduce their water usage. It will obviously generate revenue to pay for upgrades which should have been covered previously by rates.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Why is the stormwater system in Waitara still inadequate? Have the previous upgrades not been thought through adequately?

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Although I love our current tracks and trails these extensions are not necessary to our well-being and as such are not necessary.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Although a wonderful asset for some parts of our community it will not be used by all ratepayers. Upgrade or repair our current facilities.

NPDC's Draft 10 Year Plan

Submission No: 1669

Liz Cooksey

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Maybe in the future... not now.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Why?

What else?

Can we please just recover from the past year.

NPDC's Draft 10 Year Plan

Office Use Only: 3810

Submission No: 1670

Laine Phillips

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Comments

Don't extend coastal walkway, focus on the traverse

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Sports participation and obesity rates in Taranaki (and NZ) are pathetic - we urgently need to make youngsters more active and get them participating to avoid long-term adverse health outcomes. In addition, the facilities at Pukekura Park are not up to standard, particularly the Bellringer Pavillion - and need to be included up-front in the LTP to ensure the future of first class cricket is secured. This is a jewel in the crown and one of the most picturesque grounds in the world and needs to be properly maintained.

NPDC's Draft 10 Year Plan

Office Use Only: 3817

Submission No: 1674

Janet Belton

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The problems present in Otago's water recently are a reminder that we need to take action. Today we enjoy the benefit of the infrastructure paid for by others. The provision of reliable healthy water isn't free. It's a cost we simply have to face and one which history shows is better done sooner rather than later.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Improvements in the quality of water supply framed around sustainability is something I support. Having moved from Auckland and experienced the evolution of Watercare, it is the potential sale or corporate management of local assets for shareholder benefit that is a concern. Lastly, a long lasting quality repair is worth paying forward for the benefit of our kids. Admittedly the cost burden will be shared by them but it will be much less than the costs they will face having to deal with a substandard repair.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

We need to be a region of equals. It isn't acceptable to allow Waitara to have substandard services.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Taranaki is a region that must diversify. Showcasing the regions natural wonders by making them accessible to locals and visitors alike is absolutely vital. Can I suggest the council also consider adding a cycle lane up to and around the mountain on either Carrington or Mangorei roads. Building town cycle ways has been a great start but to bring larger numbers of visitors and truly improve the lifestyle quality of locals, it's a must.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I support planting and initiatives that help all members of the community understand the value of all their sustainable actions. As the add says, little can be big.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

A state of the art facility will not only benefit our youth but bring people to the region. I strongly support this option.

What else?

New Plymouth is a fantastic place to live. Those involved in leading the region appear to be strongly committed to ensuring it continues to be the best. I support council to deliver quality projects which will be valuable assets for the city well into the future.

NPDC's Draft 10 Year Plan

Submission No: 1675

Brendon Taylor

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Improve facilities at Pukekura park to enable first class (and higher) cricket matches to be played there in the future.

NPDC's Draft 10 Year Plan

Office Use Only: 3820

Submission No: 1676

Ainsley Hayes

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I think the issue is not lack of water but the poor storage of water. No point in charging people to use water (encouraging less use), focus on improving storage to make the use of the large Taranaki rainfall.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

If deemed required then fund from a reduction in spending in sculptures/art around NP. It seriously looks distasteful to the electorate when the council is spending vast amounts of rate payers money on art whilst complaining that the infrastructure is in need of serious cash injection.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Unbelievable that the council is planning to spend \$1m of rate payers money on electric vehicles whilst stating rates will increase. All this when many people have either lost their jobs or at best have pay freezes due to COVID. What an insult to the rate payers and smacks of the council believing they are immune to the impact of coronavirus.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

As per previous comments

What else?

The council are sending out the wrong message to the rate payers. One of making decisions behind closed doors that are well known to be unpopular, such as painting a rainbow on the road next to Centre City, or the Maori ward. It seems the council have the attitude 'we will do what we want'. All businesses within Taranaki are being impacted due to coronavirus and the oil and gas decisions made by the government. Many have had pay freezes, reductions or have lost their jobs. It would be interesting to see what sacrifices the council have made this year, before raising rates to already struggling rate payers.

Kelvin Hanover

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Do it properly this time fix the leaks first

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

It is a basic rite to have water - no one should have to go without because of poor public planning for years by the council

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Why has it taken so long

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

When you can't even provide footpaths or curb and channel in a lot of places walkway is not a priority
Roads are shot as well

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

No way don't waste money on electric cars no way. Discussed at the state of the upkeep of places that we visited recently plant these out using existing staff - Everett park - meeting of the waters

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Don't even have parking in this area wrong place for it any way. No no no you have use whats all ready available

What else?

Stop wasting money and provide the necessities first

NPDC's Draft 10 Year Plan

Submission No: 1678

John McBride

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

An early start on this is important!

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Support the use of water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Assume continued maintenance of existing trails and tracks.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Important, but not a priority.

What else?

Prioritize the plumbing and water use.

NPDC's Draft 10 Year Plan

Office Use Only: 3827

Submission No: 1679

Ryan Munro

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The neglect of a waste & clean water system is very poor, it is a council error of funding and management. This should not be passed onto the rate payers as they have already been paying towards the maintaining of this infrastructure. Id like to see it managed externally from the council in the future as it obviously is to easy for them to take money infrastructure maintenance budget.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I feel like installing water meters creates a false sense of security with Waste and Water, take Auckland for example it hasn't reduced any if their water issues. Start by introducing water meters into heavy industry and commercial over the next 10 years and then address residential. Dairy, oil and gas and other industry would use more water and are on the same supply as residents.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Waitara is expanding and this cost should partially be pass on to land developers not just rate payers. If they are selling land or doing a subdivision they should have to pay a larger amount towards more stormwater and drainage maintenance.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is a massive nice to have, We don't need to extend the walk way in the current climate with COVID and other major Capital projects needing to take priority. As far as the mountain track this needs way more consideration and feed back, effects from a project like this could be more damaging to the vast tracks already around the mountain. Upgrade those first.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Happy to see a green future with the NPDC cars.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Again another nice to have, major capital projects need to happen because of serious neglect and poor management from previous and some current NPDC staff.

What else?

NPDC are very much out of touch with what people want and need in the district. people cant afford a 12% rate increase followed by on going increase year on year. It is a scary thought that this number has even been considered and some planning around what can be spent with money raised from rates. With higher uncertainty in jobs due to COVID and a district which relies on oil and gas as a large employer of people in the district which will be slowly leaving NZ as government look to stop and turn green it would be ludicrous to put this in motion. Fix what you have failed to maintain and keep up with that before you get to ambitious and ahead of yourself with projects that a minority will use and enjoy.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Comments

I strongly disagree with project RD 2024 the Walkway extension to Waitara for \$25.6 million. In my view this will get very little use and the funds would be much better allocated to other projects including the other proposed trails. In my view it would be much better to spend some money making the Waitara river walk way better then encouraging people to visit Waitara to do the river walkway, this would help boost economic activity in the town. The other proposed trails make much more sense and could be completed faster with funds from the proposed walkway extension to Waitara. With scarce resources good utilization of funding is required and in my view the extension of the walk way to Waitara is not a good choice. I look forward to speaking to my submission

Boosting our Climate Action Framework

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3843

Nicky Ronee Vance Donghi

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I would rather more money was put into "Planting our Place" and not electrifying your cars. Seems silly to spend our tax money on buying you guys new electric cars if it comes at the cost of increasing rates and making it hard for more people to buy second hand electric cars.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3844

Submission No: 1686

Lauren Cameron

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

What will council do about contractors, having seen many running water into the street ignoring rationing and dismissing citizens voiced concerns

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Ensure it is available to the wide range of users that make up our population

What else?

Please consider the rates increase, as parents of families with first homes who are already struggling to pay rates, insurance, water meters (when added) and to add rates increases will add a huge burden to them

NPDC's Draft 10 Year Plan

Office Use Only: 3846

Submission No: 1687

Anna Langford

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Focus on improving the water network so it is reliable and robust (esp for natural disasters/accidents) and not water meters.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

It's all very well planting trees but what type of trees? I'm hoping natives rather than pine.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I think the hub will be a valuable asset to the region but think it should be done sooner rather than later as the price for large projects like these tends to increase over time.

Graham Richards

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Maintain and upgrade the ones we already have.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

The US, China and India need to address their Climate Change plans. NZ a very small contributor.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We can't afford this. If there is enough support it a fund raising committee needs to be formed and self funded via trust grants and donations as well as user contributions.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

The cost to change vehicle fleet is outrageous to just scrap perfectly good working vehicles. Why make us pay for them? Absolutely upsetting

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Will this include a new skating arena we have two children who skate online and artistic and the arena is literally falling apart and is a hazard with the water leaks!!! Would it be a sporting hub for all sports? Would hope so for the cost

What else?

Instead of putting water meters (which I know are already being installed) if NPDC send out conservation of water and reminders more frequently people would conserve more. I personally had no idea it was that bad and would and will make changes in our home

NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Work not to begin until households have recovered from the effects from covid

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3856

Submission No: 1691

Sarah Mason

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I've hit do nothing as I cannot understand how it would cost \$78 million to slowly chip away at a problem... how the council have let the water and sewage issues get this bad with no maintenance or preventive maintenance in their budget is actually beyond comprehension. Any maintenance should be within current budgets or funding that goes to less essential items should be redistributed. Any additional should be partially debt funded.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is not essential - if we are in such dire straits with our water issues why are we even considering this?! A lot of people in New Plymouth simply cannot afford a rates rise and are already really struggling with the cost of living and Covid. It just seems a no brained that we focus on the essential services that have been neglected badly first

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Again let's get things clean and working properly before we go investing in electric vehicles which are really unaffordable. I'm sure there are plenty of ways in which the council can work towards being sustainable and green without large scale investment and purchasing vehicles

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

New Plymouth is really behind in its infrastructure for young's kids and sport

What else?

Being realistic I recognise that there will be a small rates increase but suggesting 12% in the current climate is really unfair on the majority of those who have elected you. It fails to understand that so many of the people in New Plymouth are struggling financially and something like this would push them over the edge. We need to be more realistic about what can be done without such a large increase. I'm still at a loss why we have committed such a large some to a rugby stadium when our water supply is in dire straits.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Accountability needs to happen with the elected officials and the unelected execs that neglect strategic assets in favour of vanity projects.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Concrete is as far from green as you can get. 8% of global emissions is from concrete curing and production. There's no guarantee the same level of tourism will be coming back any time soon don't waste money on it

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Buying more things still creates emissions. Use what you have for it's useable life.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

So when powerco was sold we were promised lower to no rates, what happened? When the Mayor ran he promised no rates rises what happend. Stop wasting money on vanity projects, I'd like to see all elected officials on the hook for a percentage of any debt they incure outside of core infrastructure

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

It is disgraceful that the council has mismanaged this for so long. This is the council's core duty. This would be akin to me forgetting to feed my children for 8 years - unacceptable.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

This is simply spin and propaganda, you should be ashamed. Water meters are nothing but yet another tax, and the irony is, we are paying higher rates to enable you to tax us further, frankly, you can go ... yourself.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

There is no need to extend the walkway to Waitara, this is poor value for money. Why is there no option 4 that does not include this?

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is completely unnecessary, at a time of great economic instability and unaffordable housing, the council should be reigning in it's reckless spending, concentrate on core infrastructure only and avoiding rates rises, or even trying to lower them - wow there's a novel concept?!?! Let the users pay, not the rate payers, we cannot afford to keep getting screwed - 12% may be trivial for those on the council, it's not for the rest of us.

What else?

Stop ignoring the rate payers! Stop using council funds to promote propaganda like Jim Tuckers [REDACTED] pro draft plan article, this is a clear abuse of public funds. How about someone at the council actually front for the mismanagement of the 3 waters since the GFC, take some responsibility for it, and do all that you can do to ensure the cost of your screw ups are not passed on to already wary rate payers.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

As a sports enthusiast ,and a understanding of the major shortage of a modern sporting facility in the NP City this project is a major priority.

What else?

City infrastructure , the proposed Multi Sports Stadium are a must in my opinion . I am surprised that the Hickford Park sports grounds and facilities in Bell Block are not used more ,particularly as the area is growing very rapidly. I have a concern with the proposed development that is planned at Waiwakaio and the effect it will have on our CBD . Other NZ Cities CBD'S including Tauranga and Hamilton have seen a massive number of shops closing over recent years because of out of town shopping malls.
