

Fee types

There are two fee types:

1. Fixed fee. This fee covers projects where the costs are easily identified before application, or where an average rate is appropriate. The amount is fixed. No additional costs will be charged by NPDC in regard to the fee quoted.
2. Base fee. The base fee is based on the anticipated costs for the project and is non-refundable.

Application for amendment generates an individual fee which covers all non-technical aspects of the amendment process including electronic lodgement, administration time, completeness check, document acceptance and client liaison (time spent on the application by a technical officer will be also charged as detailed in the 'Costs for additional staff time' section of the fees and charges).

Application for code compliance certificate generates an individual fee which covers electronic lodgement, administration time, completeness check, document acceptance, technical check of application, client liaison and certificate issue.

In some cases actual costs of a project may exceed the estimated minimum fee, due to external or specialist inputs, additional information submitted, application complexity, inspection complexity or additional inspections undertaken.

At the end of a project, if the actual costs have significantly exceeded the minimum fee, an invoice for the additional costs will be sent and are required to be paid prior to issue of a code compliance certificate.

Cancellations

When an application is withdrawn before the consent is issued and fees are outstanding, an invoice for the work completed to date will be sent to the fee payer.

If an application is withdrawn after the consent is issued, a refund will be sent to the payer for monies not used by the activities to date.

Payment of fees

You will be invoiced on submission for all fees and levies applicable to your consent based on the estimated value of your building work. Once full payment has been received, we will accept your application for processing.

Extra inspections or re-inspections will be invoiced at the end of the project, including any additional processing or amendment fees outstanding. All charges are required to be paid prior to the issue of the code compliance certificate.

A reduced application fee may be set by the Manager Building (Building Lead) where unusual circumstances or the characteristics of the application would make it inappropriate to charge the normal fixed fee or base fee.

Where an application belongs within a higher fee category, additional fees will be required to be paid before the continuation of processing. This will apply when the work is undervalued. The estimated value of the finished work will be used.

Where an application falls within more than one fee category, the higher category will apply.

Non-payment of fees or the invoiced additional processing costs will result in processing or inspections being suspended unless alternative payment arrangements have been formally agreed.

A typical calculation of the fee you are to pay can be done using this formula:

Value of work under \$20,000:

- Base fee for category + accreditation levy.

Value of work over \$20,000:

- Base fee for category + BRANZ levy + accreditation levy.

Value of work \$65,000 and over:

- Base fee for category + MBIE building levy + BRANZ levy + accreditation levy.

Note: unless otherwise specified, for uses that fall into more than one category, the higher cost category applies.
