

Submission of Fay Looney For plan change 48.

I submit this objection in response to further expert evidence of Applicant, Oakura Farm Park Ltd.

Trust of this applicant is the biggest issue for myself .

The law has not recognised the spectacular failings of the applicants failure to support the conditions of his past subdivision “The paddocks” clearly vocalised at the 30th October hearing.

All the negative aspects of this new application are clearly indicated by the reports of the submitters expert evidence.

The arrogance of the applicants advisers dismissing personal safety aspects for children and residents , not to mention cultural concerns landscape & visual Effects is beyond belief.

Another bite of the cherry should not be an option for greed and lack of respect for what has gone before, our community created a plan one we can live with one that allows sensible development, why can those that should, not trust the communities voice.

Fay Looney
